

StiroFert
FOR MODERN CONSTRUCTIONS

MODERN BUILDING CONSTRUCTIONS
 Product is patented and attested in IMS Belgrade

Steel anchors - connection between StiroFert construction and roof ties

Connection between roof panes

Steel anchors - connection between StiroFert construction and roof ties

StiroFert roof construction
 roof covering
 roof battens 5x8cm
 roof battens 5x8cm
 clean free felt
 ordinary concrete
 StiroFert beams
 insulator "StiroFert" block
 made from lightweight concrete
 thermo-insulating, noise-insulating
 steam-free, fire-resistor
 walls are finished by parget

StiroFert intermediate floor construction
 sub-floor
 binder material
 ordinary concrete
 StiroFert beams
 plastic net and polystyrene
 smoothing
 colouring

StiroFert intermediate floor construction
 for intermediate floor construction
 (range to 22 meter or even more)
 lightweight weight more than 30%
 lower than other floor construction)
 for public, industrial and private
 multi level buildings and superstructures
 weight up production (from 30 to 50N)
 excellent thermo-insulating
 characteristics (k=0.39W/m²C)
 high noise-insulating characteristics
 (no need for floating floor)

StiroFert stringcourses
 Walls can be reinforced
 in both ways (horizontal or vertical)

StiroFert door and window details
